ATOM LEARNING

Product Manager

Atom Learning, one of the UK's fastest growing education technology startups, is hiring for Product Managers.

Atom Learning is an online learning platform that is making education fairer. We want to provide all children whatever their background and wherever they are in the world with an affordable, high-quality education. To achieve our goal, we are combining exceptional teacher-made content with machine learning to keep students on their optimal learning paths.

Atom Learning is growing rapidly with hundreds of schools in the UK and abroad using the platform and thousands of independent subscribers. We have partnered with one of the largest global publishing houses with distribution into thousands of schools in the UK and abroad; we are in talks with national governments to develop their digital learning strategies; and we're just getting started!

We are ranked one of the UK's top 100 startups by Startups100, are a finalist for the AI Award in the Lloyds Bank Business Awards, won the Best AI-based Solution for Education in the AI Breakthrough Awards, were a finalist in the Education Investor awards 2018 and Amazon Growing Business Awards 2018 as Young Company of the Year.

We are a growing team of 30 with offices in Soho; we have big ambitions and anticipate being a team of at least 60 in a year's time.

The role:

Atom Learning is looking for a Product Manager to join the team at our offices in Soho. The Atom Learning Product Manager will work alongside the founders and the head of product. The Product Manager will split their time between prototyping, designing and implementing new features, working closely with the development team, and working

with qualified teachers and experienced educators to ensure the high quality of teaching materials on our platform.

Responsibilities:

- Developing new products to launch through the platform;
- Creating and adding new features to the platform;
- Communicating with key stakeholders including schools, parents and students to determine faults, strengths and new features to add;
- Leading research into how best to deliver educational content across multimedia channels;
- Designing the syllabuses and course structures across the platform;
- Managing and refining the content on the platform;
- Overseeing the creation of new content, including managing a team of content creators;
- Working with Atom Learning's technology team to improve and manage existing features on the platform.

Ideal candidate:

- Strong work ethic and highly ambitious;
- A keen and intuitive contributor and communicator;
- A desire to work in the education sector;
- An interest in product development and technology;
- Excellent written English;
- Excellent organisational and time management skills;
- An interest in being a part of a growing business;
- Experience as a teacher/working with schools (Plus);
- Strong design skills and experience using professional design software (Plus).

What we offer:

- 28 days holiday + bank holidays;
- Competitive pay;
- Full auto-enrolment workplace pension;
- High degree of autonomy and exposure to the running of all business areas of a successful start up;

- The opportunity to become an integral member of a fast growing technology company;
- Frequent team dinners and drinks;
- An office on Dean Street, Soho.

Please email jake@atomlearning.co.uk with a CV and short cover letter in the body of the email. Please use 'Product Manager: your name' as the heading.
